

QUANTOFIX® Total acid

en

Description:

QUANTOFIX® Total acid are test strips for semi-quantitative determination of the total acid content. The total acid content is expressed as g of citric acid per L. QUANTOFIX® Total acid test strips are also suitable for reflectometric evaluation using the QUANTOFIX® Relax (REF 913 46).

Pack content:

1 aluminium can with 100 test strips

Measurement range

Visually
2–5 g/L citric acid

Reflectometrically
2–5 g/L citric acid

Color gradations:

0 · 2.0 · 2.5 · 3.0 · 3.5 · 4.0 · 5.0 g/L citric acid

General indications:

Always withdraw only the required number of test strips. Immediately reseal can after withdrawal. Do not touch the test fields.

Instructions for use:

1. Dip test strip into the test solution for 2 seconds.
2. Shake off excess liquid.
3. Wait 5 minutes.

4. Compare the test fields immediately to the color scale. Read the values which match the color of the test fields most closely (reading accuracy: $\pm \frac{1}{2}$ colored field of the scale).

The reaction color of the test fields may continue to change after elapse of the reaction time. It is therefore important to perform the evaluation at the specified time in order to achieve correct results.

Interferences:

The determination is not disturbed by the following maximum concentrations of impurities (tested with citric acid solutions of 0 and 3.5 g/L):

5000 mg/L: Na⁺, K⁺, Cl⁻, I⁻, SO₄²⁻

2000 mg/L: H₂O₂

1000 mg/L: NO₃⁻, NO₂⁻

750 mg/L: Cu²⁺

500 mg/L: Mg²⁺

350 mg/L: Ca²⁺

Notes:

Carbonic acid is also detected by this test, and the sample should therefore be degassed beforehand.

If the test strips indicate a value in excess of 5 g/L, the sample must be diluted until the total acid content is in the measuring range of the test paper. When indicating the content, consider the dilution factor.

Disposal:

Dispose of used test strips into the household waste.

Storage:

Avoid exposing the test strips to light and moisture. Keep container in a cool, dry place (storage temperature not above 30 °C / 86 °F).

If stored properly, the test can be used until the imprinted expiration date.
